Small

AirMini is the world's smallest CPAP – weighing less than a pound and fitting in the palm of your hand.

Smart

HumidX™ waterless humidification and the AirMini app make AirMini the ultimate in portable comfort and convenience.

Proven

AirMini delivers the quality of therapy CPAP users have grown to trust from ResMed over the last 25 years, featuring the same proven therapy modes used in the AirSense™ 10.

AirMini™

- Smallest portable CPAP on the market today
- Effective waterless humidification for portable convenience *
- Convenient control with the AirMini app
- Premium travel bag and accessories for therapy on the go

customer reviews

"I received the Mini yesterday and tried it out last night. Since I am one of the first people getting one of these, I thought I would let you know my first impressions. There really wasn't any setup - just plug it in, connect the hose, and pair the Bluetooth to the app on my phone. Out of the box it was set to detect when you put the mask on and automatically start; you can control that and the auto shut-off from an obvious* settings panel in the app." "The Mini itself is extremely quiet and very small - much smaller than my dad's portable unit."

Get yours, today!

This awesome tiny travel CPAP/APAP, the AirMini™ is now available at Mitchell Home Medical. Contact us at clinical@mitchellhomemedical.com or call us at 800-420-0202 for more information.
