PAP compliance initiative

CPAP/BIPAP compliance

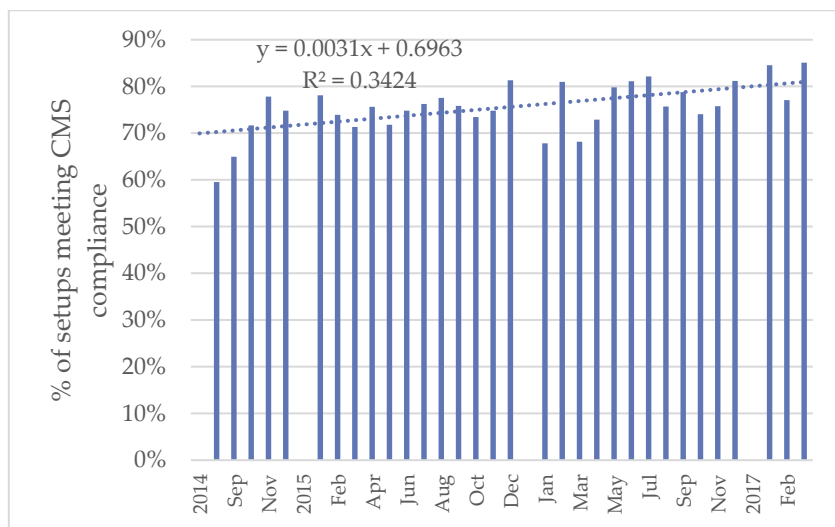

March 2017- Mitchell meets its CPAP/BIPAP compliance goals!

In Sept. 2014 Mitchell Home, Medical (MHM) re-focused its compliance monitoring and adherence efforts to better serve

its patients, referral sources and its own interests for better patient care.

MHM has seen a steady increase in overall compliance rates

Compliance rates have increased greater than 7% each year

MHM monitors its compliance rates internally, but recent assessments by a third party confirms that **Mitchell Home Medical has reached its stated goal of 86% of its patient's setup meeting CMS usage requirements!**

The goal of 86% was based upon identification of characteristics extracted from

multiple peer reviewed publications.

If you would like to discuss how we have obtained these compliance advances, contact us at clinical@mitchellhomemedical.com

3rd party confirmation

"I wanted to congratulate you on a new high Mitchell hit in the month of March. For patients set up in March 2017 your compliance percentage is already at 85.19% and will go higher for the 90-day period. This is an all-time high".

Mitchell Home Medical will continue to strive for even higher compliance rates and we will keep you informed of our progress!

In addition, MHM continues to monitor efficacy of therapy through OptumCare! If you want your patients to have optimal care, ASK US ABOUT OPTUMCARE!
